PHIL102: Introduction to Critical Thinking and Logic

Nishu Kumari

28 February 2026

Why I Choose this course ?

The primary motivation for choosing this course was to move beyond intuitive thinking and develop a system of analytical rigor. By studying the structure of arguments, I have learned to distinguish between validity (the logical flow) and soundness (the truth of the premises). This skill is essential for evaluating reports, proposals, and data without being misled by persuasive but flawed rhetoric.

The course provides a deep dive into the Hypothetico-Deductive method and Occam's Razor. Learning to formulate testable hypotheses and seek the most parsimonious (simplest) explanation ensures that problem-solving is efficient and evidence-based.

Learning Outcome of this Course ?

1. Understand Core Concepts in Logic

- Distinguish between arguments and non-arguments
- Identify premises and conclusions
- Understand deductive vs. inductive reasoning
- Recognize validity, soundness, strength, and cogency

2. Improve Critical Thinking Skills

- Question assumptions
- Differentiate fact from opinion
- Evaluate sources critically
- Make reasoned decisions based on evidence
